EXPERIENCE

SMB Operations Director
Ooredoo

06/2020 – 04/2026
Qatar

Delivered 5% YoY growth for a \$200M multi-channel telecom P&L, beating market growth by 2x in a saturated, hyper-competitive segment. Directed the portfolio strategy, offer design, and launch governance while aligning cross-functional stakeholders across the product lifecycle to scale revenue streams, enforce pricing discipline, and optimize commercial efficiency.

Product Portfolio & Offer Strategy

- Restructured the SMB product portfolio into six needs-based solution areas validated by customer beta testing, creating the standard GTM taxonomy adopted across sales, marketing, and digital channels.
- Built and commercialized a hyperscaler, OEM, and managed-services portfolio spanning Microsoft 365, cloud, cybersecurity, networking, and SaaS attach motions, lifting SMB ARPA 35% over two years while deepening portfolio entanglement with core fixed and mobile services.
- Developed investment-grade business cases for new products and revenue streams, including market opportunity, customer pain-point validation, competitive analysis, pricing, revenue modeling, ROI, break-even analysis, risk assessment, and GTM plans used to secure executive funding and launch approval.
- Architected and executed channel-specific offer constructs across direct, indirect, and digital touchpoints; synchronized pricing, bundling, and incentive structures to ensure seamless omnichannel consistency and field readiness.
- Stood up a Voice-of-Customer program deployed across 10 customer touchpoints with closed-loop discipline, feeding portfolio and offer decisions back into the commercialization roadmap.

Launch Governance & Lifecycle Management

- Stood up cross-functional launch governance for SMB products and offers, coordinating Product, Marketing, Legal, Finance, Sales, and Operations through requirements, readiness gates, go/no-go decisions, and post-launch audits.
- Architected a PLM-integrated CMS and governed digital forms library with embedded validation, e-signatures, CRM handoffs, and connected-tablet access, creating a single source of truth for field-ready content and order execution.
- Commercialized the SOHO indirect channel through 5 partner firms and 100+ agents equipped with SFA, CRM, CMS, and products catalog through connected tablets enabling autonomous sales, onboarding, and retention.

Channels & New Revenue Streams

- Owned product strategy, MVP definition, and feature-backlog management for a first-to-market B2B digital self-service app, anchoring the experience on the SMB portfolio's six needs-based solution areas. Shipped guided CPQ and a RAG-based AI sales assistant grounded in CRM, regulatory tariff libraries, and product documentation, cutting digital order CAC by 50% and compressing customer onboarding from days to hours.
- Developed the business case, commercial model, and go-to-market strategy for an embedded B2B2C distribution channel placing connectivity offers inside third-party customer journeys, capturing +2% fiber market share at near-zero CAC.
- Led GTM strategy of Huawei's IdeaHub platform by shifting the business model from CAPEX to OPEX lease-to-own structure; retained legacy accounts via value-driven connectivity bundles, accelerated adoption to 800 units in Year 1, and secured Huawei's Best Carrier Partner of the Year award for the MECA region.

- Created a new product category for micro-SMBs, "Smart Office" to reclaim market share from a low-price challenger, positioning a high-margin 5G/IP-voice solution as a premium, value-driven alternative to cheap fiber. Enforced strict CRM and channel governance to eliminate internal cannibalization risks, securing 1,500 new acquisitions in Year 1.
- Developed and secured executive approval for a market and financial business case that launched a privacy-compliant data monetization platform (Marketing Campaign as a Service), transforming anonymized customer insights into a scalable high-margin revenue stream.

Performance & Pricing

- Stood up Deal Desk and pricing governance, including discount approval framework, non-standard term reviews, and margin guardrails that protected unit economics across complex offers without slowing deal velocity.
- Governed post-launch performance and portfolio rationalization; established a structured impact-assessment framework to rapidly optimize underperforming offers without sacrificing unit economics.
- Architected an AI-driven commercial enablement engine, automating the production of launch assets and compressing product-to-field readiness cycles by 50%.

Assistant Director Solutions

09/2014 – 06/2020

Ooredoo

Qatar

- Led enterprise solution sales for a \$600M B2B business, directing sales engineers and solution architects across pursuit strategy, bid qualification, solution design, executive presentations, commercial negotiations, and contract execution for complex ICT, cloud, and managed-services opportunities.
- Drove bid-to-win ratio to 28% by combining MEDDPIC qualification methodology with deal-level Commit, Best Case, and Upside forecast tagging and rigorous SFA hygiene discipline, embedded into weekly deal-review coaching.
- Led pursuit and closure of a \$50M global secure network for 110 diplomatic missions, coordinating solution design, partner strategy, and commercial negotiations while improving margins by 3%.

Director S&LG Accounts

06/2009 – 09/2014

Electronic Data Systems (EDS)

Raleigh, NC

- Owned P&L, executive stakeholder relationships, contract management, and growth strategy for a portfolio of State & Local Government customers, securing 100% renewals and multiple contract expansions.
- Directed a three-year \$25M Electronic Medical Records modernization at the NC DHHS — supervised HIPAA-compliant COTS customization and rollout across 100 counties with FTEs, partners, and contractors.
- Recovered a \$12M Maryland Retirement Services modernization — negotiated baseline scope, deployed change management, and stood up an offshore development team to deliver against a legacy mainframe environment.

Systems Development Director

08/2002 – 06/2009

Saber Software (Acquired by EDS)

Portland, OR

- Capitalizing on the Help America Vote Act as a market-creation opportunity, built and scaled the company's Voter Registration and Elections Management practice, propelling annual revenue from \$5.8M to \$57.8M in four years across 13 states.
- Codified the commercialization playbook, pricing structure, packaging tiers, partner enablement, customer onboarding model, and reference customer program that turned Saber from a regional provider into a national category leader.
- Designed a six-track deployment blueprint and national sales model that transformed bespoke implementations into scalable rollouts with a 100% on-time, on-budget track record across all 13 states.
- Earned the 181st ranking on the 2007 Deloitte Technology Fast 500, and the practice's commercial momentum led to Saber's acquisition by EDS in 2008.
- Led due diligence and post-close integration of Covansys Corporation's \$40M S&LG practice acquisition, consolidating consulting practices, onboarding 300 employees and dozens of in-flight projects, and identifying operational cost reduction opportunities.
